

28% EVA FR Protective Window Film

1. Product Description

A very high tack, masking tape for use in surface protection of glass. Formulated for protection of external glass against plaster/paint/mortar splashes, specifically for use as an alternative to **Protectorglaze Windocoat** in sub-zero temperatures.

This product consists of a flame retardant, low density, blended Polyethylene backing, coated with a custom formulated EVA adhesive for external use, particularly in wet and freezing conditions, where water based adhesives will freeze and de-bond from the film.

2. Product Characteristics

2.1. Construction

Density – 0.932kg/m³
Adhesive – 28% EVA Dispersion
Total Thickness – 100 microns
Colour – Clear

2.2. Performance

Tensile Strength - MD 10-12 MN/m²
TD 9-11 MN/m²
Elongation % - MD 600-700%
TD 650-750%

3. Fire Performance – This product is compliant with the LPS 1207 standard for flame retardant performance.

The product is available in sizes of both 600, 800, 1000 and 1200mm wide and in lengths of 100m.
